

Aftercare Instructions for Lip Blushing

Day 1:

- Wipe the lip with a moistened cotton pad every 30 minutes for 3 hours following your appointment and apply healing ointment.
- Removing lymph and blood will prevent formation of a thick scab.
- After 3 hours, wipe lip every 1 hour until bed time and apply healing ointment.

Day 2:

- Wipe lips 4-6 times per day. Keep them moist with healing ointment.

Days 3-7:

- Wipe lips AM and PM, keep them moist. By the end of the 7 days, lips should be fully exfoliated.

ALWAYS keep lips moist and protected from UV Exposure.

NO Biting into anything, cut your food up into small pieces when eating.

It is normal for the lips to appear swollen and/or bruised for a couple of days.

It is recommended to use a natural toothpaste after having your lips done, as chemicals or whitening agents in the toothpaste could cause the lips to fade or become blotchy.
